

A PARENTS GUIDE TO **Using** Scripture to Protect

www.bibleparent.com

Are you warning your children about sin?

One way is to cut out some of our Bible Memory Cards and put them in a bowl on the TV set. Memorizing a Bible verse earns a child ½ hour of television. It is one way parents can GIVE GOD EQUAL TIME.

In today's world we can't effectively protect children from being exposed to sin. Our only choice is to WARN them and expose them to God and his word as often as possible.

At www.bibleparent.com we give parents free Bible Memory Cards. Actually using the cards is up to the parent. A few facts that might help you decide to put a bowl on your TV, and maybe your computer.

1. The average Soap Opera has 19 instances of adultery every half hour.
2. The number one users of internet porn are boys age 12-17.
3. Eighty percent of eight year old have seen these sites.

From a bit different angle. Do you think violent images on TV are harmless. It's true...at least its true for the emotionally balanced child. The angry child however is over 1,000 times as likely to ACT OUT what he sees. Violent images are OK by themselves but combined with anger they are like fire and gasoline. The potential for DESTRUCTION AND PAIN is just too great to allow the two to come together..

The new morality is sensuality. The new religion is sensationalism. The overwhelming majority of our nations children worship at those altars many times a day. A bowl of bible verses on the television may not turn the tide overnight but at least it calls attention to the struggle.

We hope you visit www.bibleparent.com and take a look around.
