

I am back from Singapore but can't Seem to get a normal sleep cycle.

My brother Phillip is adapting to living in a lockdown unit but it is so sad to see his brain get worse and worse. It should not be but sadly is a challenge to my faith. Hope you might pray God's comfort for Phillip White??

The two things that stood out to me at the Singapore summit for child evangelism were

1. how sad it is that the Hindu's in India crippled compassion international and dumped over 100.000 borderline kids with nowhere to land. I would still recommend compassion international as our number one choice of charity. They can't be blamed for in country politics. I spoke personally with a number of country leaders and in answer to prayers spent time with their comptroller/accountant.
2. Nearly every speaker from Africa knew 10 to 100 sexually abused children personally. All I could offer were one Bible lesson and a blessing that has helped children I have known. Hope some at least might pray for Nigeria split 50 50 with muslims and Christians, The muslims at least want control of the billions of oil money.

These next two weeks I have a lot of contacts to make and articles to write. Hope you might pray God's grace to get so I can sleep at night but not so much during the day??
